PROFESSIONAL PROFILE

B.Tech Computer Science and Engineering student specializing in Data Science & Machine Learning, interested in software development, data science, machine learning, AI, and cloud technologies.

SKILLS

Languages: Python, C, C++, JavaScript, SQL, HTML5, CSS3

Data Science & ML: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch, Machine Learning, Data Analysis

Web Development: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, Tailwind CSS

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Vercel, Netlify, Postman

Databases: MySQL, MongoDB

Core: Data Structures & Algorithms, DBMS

PROJECTS

Personal Portfolio Website

React.js, Next.js, Tailwind CSS, TypeScript, React Icons, Vercel

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, certifications, and development experience.
- Built reusable React/Next.js components with Tailwind CSS and React Icons for a clean, responsive, and interactive user interface.
- Added project and certificate filtering, responsive layouts, interactive sections, and data-driven content organization.

Portfolio: [LINK](#)

Smart IoT-Based Kitchen Drain Monitoring System

ESP32, IoT, Blynk, Sensors, C/C++, Wokwi

- Developed a smart IoT-based kitchen drain monitoring system designed to detect grease buildup, water-level issues, and potential drain overflow.
- Integrated an ESP32 with turbidity, LDR, and ultrasonic sensors to monitor drain conditions in real time.
- Implemented automated pump control and status indication to help prevent drain blockage and overflow.
- Connected the system with Blynk for remote monitoring, dashboard visualization, and alert notifications.

Student Performance & Academic Analytics Platform

Python, Streamlit, Pandas, NumPy, Matplotlib, SQL

- Developed an academic analytics platform for managing student performance data including marks, assignments, examinations, and attendance.
- Implemented automatic percentage, grade, SGPA/CGPA calculations and student performance analysis.
- Created interactive dashboards for student, class, subject-wise, and semester-wise performance insights.
- Used data visualization and analytics to make academic performance easier to monitor and interpret.

EXPERIENCE

GirlScript Summer of Code — Open Source Contributor

2026

- Contributed to open-source projects through GirlScript Summer of Code and collaborated with developers in a community-driven development environment.
- Worked with Git and GitHub-based workflows including repositories, issues, branches, commits, and pull requests.
- Improved practical experience in collaborative software development, open-source contribution, and version control.

CERTIFICATIONS / ACHIEVEMENTS

upGrad Course Completion Certificate [Verify](#)

Introduction to Cloud Computing [Verify](#)

Lovely Professional University

2025 – Present

Bachelor of Technology — Computer Science and Engineering

Specialization: Data Science & Machine Learning
